

Lab06 - Modeling Class Diagram and Activity Diagram (Point of Sale System)

202201194

KENIL SARANG

Task 1: Use Case Textual Descriptions for "Process Sale" and "Handle Return" Use Cases

Use Case 1: Process Sale

- **Use Case Name:** Process Sale
- **Actor(s):**
 - Cashier
 - Catalog System (external actor)
 - Inventory System (external actor)
- **Precondition:**
 - The cashier must be logged in.
 - The items must be available in both the catalog and inventory systems.
- **Postcondition:**
 - The sale is successfully recorded in the system.
 - The inventory stock is updated.
 - A receipt is printed for the customer.
- **Main Flow:**
 - The cashier initiates a new sale.
 - The cashier scans an item.
 - The system retrieves item details from the catalog.
 - The system decreases the item quantity in the inventory.
 - Steps 2-4 are repeated for each item.
 - The customer selects a payment method.
 - The system processes the payment (cash, credit card, etc.).
 - Upon payment confirmation, the system prints a receipt.
- **Alternative Flow:**
 - If an item cannot be found in the catalog, the cashier is alerted.
 - If stock is insufficient, the cashier is informed to notify the customer.
 - If the payment fails, the cashier may retry or cancel the sale.

Use Case 2: Handle Returns

- **Use Case Name:** Handle Returns
- **Actor(s):**
 - Cashier
 - Inventory System (external actor)
- **Precondition:**
 - The cashier must be logged in.
 - The item being returned must be associated with a previous sale.
- **Postcondition:**
 - The return is successfully processed, and stock levels are updated in the inventory.
 - The customer receives a refund or store credit, as applicable.
- **Main Flow:**
 - The cashier begins a return transaction.
 - The cashier scans the item(s) being returned and verifies the original sale if necessary.
 - The system retrieves item information from the inventory.
 - The cashier checks if the return is within the return policy.
 - The system updates the inventory by restocking the returned item(s).
 - The system issues a refund or store credit to the customer.
- **Alternative Flow:**
 - If the return period has expired, the system alerts the cashier to decline the return.
 - If the item is damaged or incomplete, the return may be partially refunded or denied.

Task 2: Identification of Entity, Boundary, and Control Objects

Entity Objects:

- Sale
- Product
- Payment
- Receipt
- Return

Boundary Objects:

- Cashier Interface

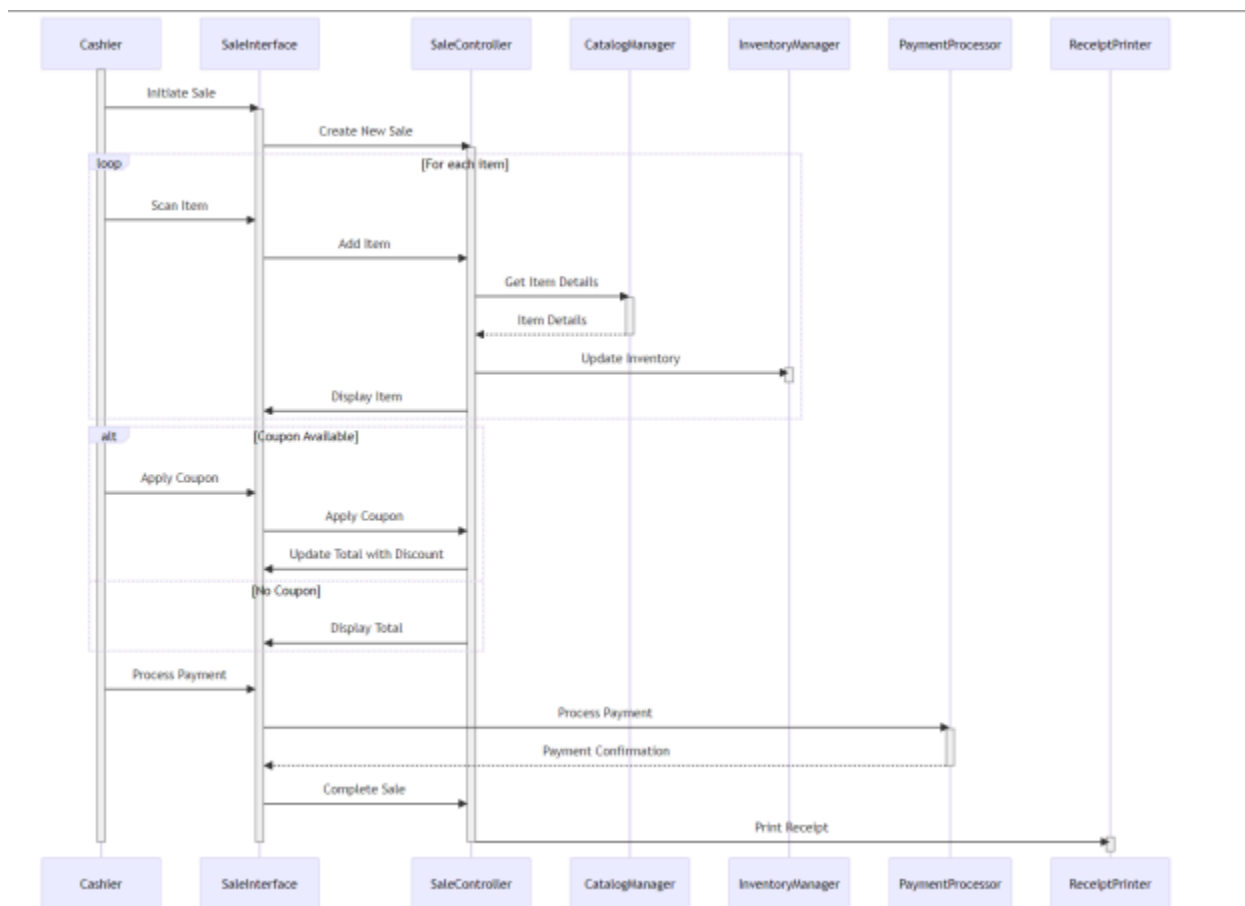

- Catalog System
- Inventory System

Control Objects:

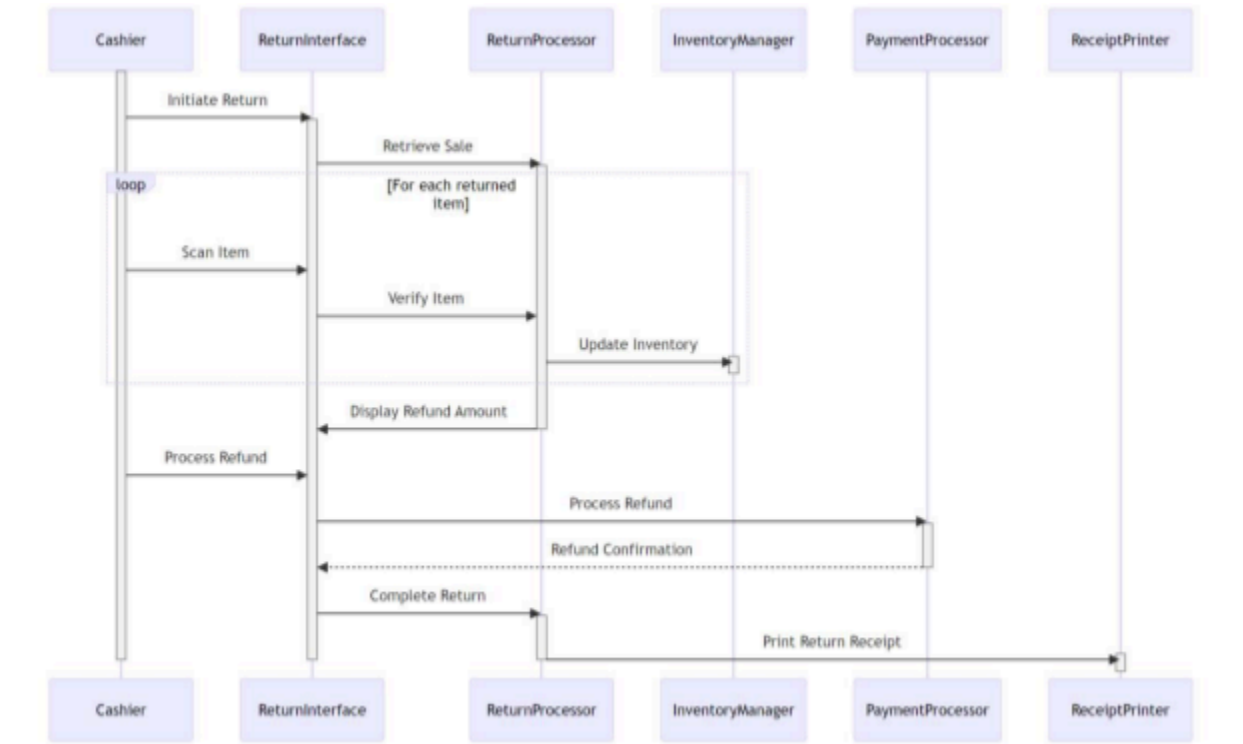

- Process Sale Controller
- Handle Payment Controller
- Handle Return Controller

Task 3: Develop Sequence Diagrams

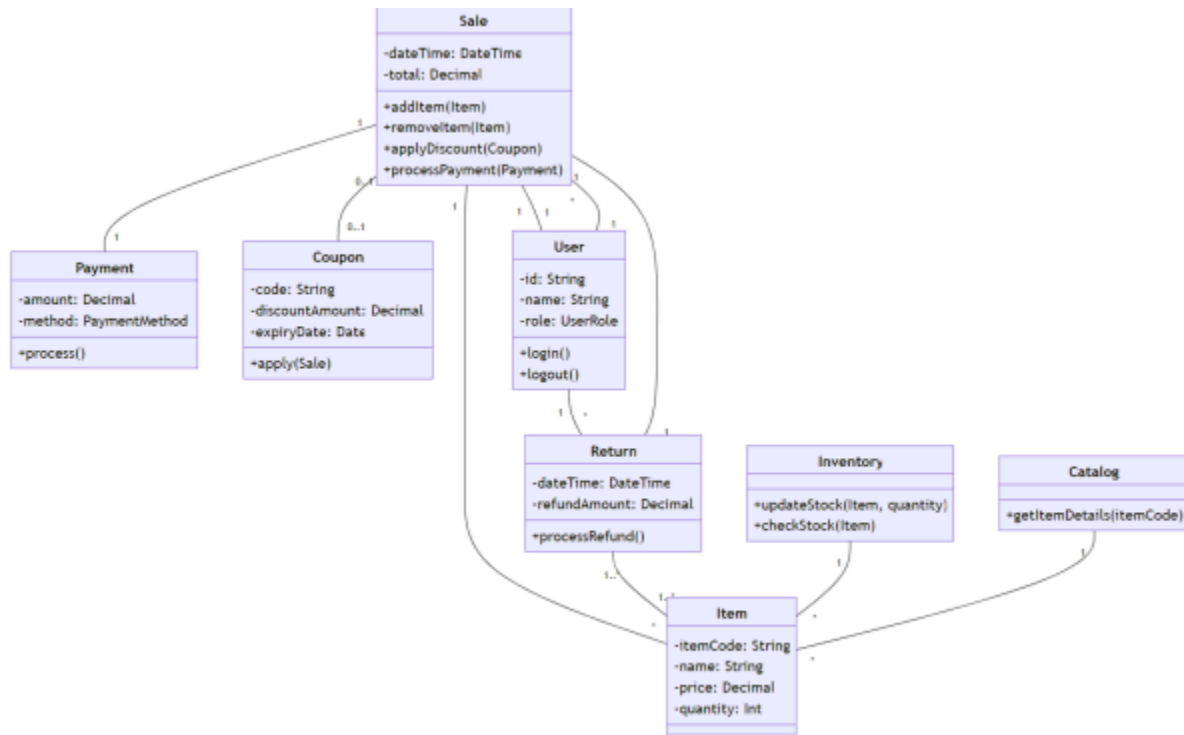

• Process Sale

- Handle Return

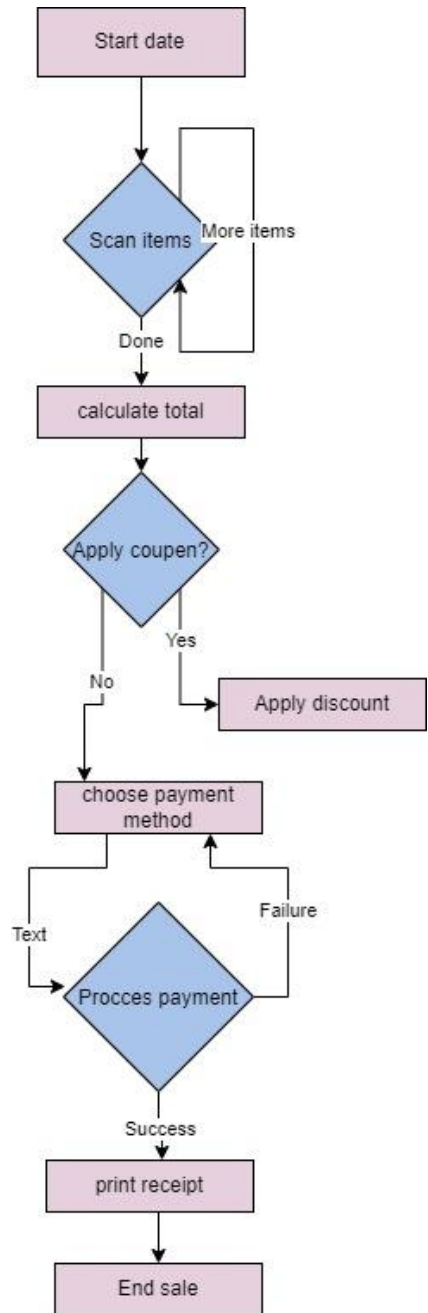

Task 4: Develop Analysis Domain Models

Task 5: Develop activity diagram for "Process Sale" and "Handle Return" use cases.

• Process Sale

- **Handle Return**
